Search, sort and export vital information from the most trusted directories

**Search**

Gale’s authoritative directories are now available online from the Gale Directory Library. Trusted references that have been available on your reference shelf are now available to researchers 24/7.

Build a collection of directories based on the needs of your community, then search a single volume or cross-search multiple titles.

**Sort**

Not only are these directories more accessible, they’re also more powerful, since expanded data sets allow you to sort according to your needs. Students doing demographic research; businesses seeking prospects; fundraisers looking for contacts; and patrons searching for organizations will all find new uses for the directories you provide online.

**Export**

Gale Directory Library allows a range of data sorting, filtering and exporting options so users can customize results and put them to practical use.

**Save!**

Gale offers special savings opportunities to help you make the move from print to online.
Gale, part of Cengage Learning, is known for publishing authoritative directories on companies, publishers, associations and more. Now these directories are available online from Gale Directory Library. This new platform takes these detailed references off the shelf and makes them available online, anytime.

**Gale Directory Library offers more than 30 essential directories, with more to come**
- All directories are cross-searchable
- Use it like a database; own it like a book collection
- State-of-the-art search, sort and export features
- Available 24/7 from any Internet-connected computer
- Choose the directory titles you want and own the data
- Print, e-mail or download individual entries
- Entries include hot-linked Web sites and e-mail addresses
- Export results to CSV format to analyze data or generate mailing lists
- Marked items lists produce custom results
- Available backfiles provide historical data

An essential research and marketing tool
With Gale Directory Library, researchers can perform a range of data sorting, filtering and exporting activities. These innovative features, unlike anything seen previously with our directory products, make Gale Directory Library the essential tool for research and marketing alike.

- **Find contacts** — Finding a company, person, publication (or other kind of entity) is easy. Basic search lets users quickly look up entries by name or keyword. Or use Advanced Search to search specific fields of information.
- **Generate lists, analyze trends** — Export search results and use them in programs like Word or Excel, making the creation of mailing lists and data analysis a snap.
- **Cross-searchable** — Provides support for a growing number of directory titles. Each can be searched individually by its own unique data fields, or users can search the entire directory collection.

www.gale.com/DirectoryLibrary

1. **Search** Cross-search multiple directories to find the specific information you are looking for.
2. **Sort** Review your search results and sort them by entry name, directory, date or other applicable data.
3. **Export** Get your results in CSV format. Use them in Excel, Word or any other program.
4. **Act** Use your data to make call lists or generate mailing lists, analyze information and more!
