About Gale Directory Library

With Gale Directory Library, researchers can use state-of-the-art functionality to perform a range of data sorting, filtering and exporting. These innovative features, unlike anything seen previously from our directories, make Gale Directory Library the essential tool for research.

- Find contacts — Finding a company, person, publication (or other kind of entity) is easy. Basic search lets users quickly look up names, search by keyword, and browse the full text of your directory holdings.
- Generate lists, analyze trends — Export search results and use them in programs like Excel or Word, making the creation of mailing lists a snap.
- Cross-searchable — Search across our growing number of directory titles. Each directory can be searched individually by its own unique data fields, or search the entire directory collection.

Additional benefits of Gale Directory Library:

- Use it like a database; buy and own it like a book collection
- State-of-the-art search, sort and export features
- Available 24/7 from any Internet-connected computer
- Choose the directory titles you want, and own the data
- Print, e-mail or download individual entries
- Entries include hot-linked Web sites and e-mail addresses (when available)
- Export results to analyze data or generate mailing lists
- Includes more data than print version, when appropriate
- Marked items lists let you select entries to generate custom results
- Available backfiles provide historical data
- Growing list of available directories
