AUTHORITATIVE, PRACTICAL BUSINESS INFORMATION

*RDS Business and Management Practices* is a unique, detailed database focusing on the processes, methods and strategies of managing a business. *RDS Business and Management Practices* is invaluable for corporate, business and information professionals as well as students and general researchers, delivering real-world know-how about business planning, decision-making and management issues.

*RDS Business and Management Practices* emphasizes the practical side of business and management, namely, how organizations make decisions, adopt and implement new technologies and techniques, and plan for change and expansion. By focusing on real-life applications, case studies and explicit “how-to” guidelines, *RDS Business and Management Practices* provides users with an effective and easy-to-use management tool for keeping abreast of methods useful within any organization.

Use *RDS Business and Management Practices* when searching for:

- Broad management issues such as benchmarking, best practices, business plans, corporate culture, long range planning, quality control, re-engineering, and more.
- Topics and/or issues such as wikis, organizational development, promotion, telecommuting, training, wages, and more.

BROAD, AUTHORITATIVE COVERAGE

*RDS Business and Management Practices* offers highly focused coverage of thousands of core professional and trade journals containing information relevant to the fields of management, planning, production, finance, marketing, information technology and human resources. Approximately 75% of all journal titles are full text.

Like the acclaimed *RDS® Business & Industry*, *RDS Business and Management Practices* features detailed indexing for precise information retrieval. *RDS Business and Management Practices*’ indexing is flexible and easy to use — ensuring quick and effective results. By using the databases’ unique Concept Terms coupled with Department and Industry Names, you can easily locate management information relevant to your needs.

- Concept Term — *RDS Business and Management Practices* uses natural language terms that describe just under 400 of today’s most widely discussed and used business practices and management methods. Concept Terms include alliances, brand identity, cost reduction, downsizing, outsourcing, performance evaluation, project management and restructuring.
- Department Name — For information about management applications related to specific functional areas or department names such as “Marketing and Sales” or “Human Resources” make it easy to obtain focused and relevant management content.
**RDS® BUSINESS SUITE®**

RDS Business and Management Practices is also available as part of the RDS Business Suite, providing balanced and highly focused coverage of international company and industry news. RDS Business Suite includes **RDS® Business & Industry**, **RDS Business and Management Practices** and **RDS® TableBase®**.
